Specified Agricultural Commodities: Unloads from All		
Sources, by Origin	19	30

PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also outshipments from the State. Several items of minor importance are excluded, and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; dairy and swine products are from farms with herds of 10 or more head. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the Mainland as well as unloads from the outer islands, and therefore does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighboring islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies. As will be noted from the tables, of total supply of produce and livestock products has been above the 5-year average during the period of 1956-1960. Tourists and Honolulu population have increased consistently during the past 5-year period.

ACKNOWLEDGMENT

The Federal-State Market Report work was made possible through the cooperation of the Agricultural Marketing Service, U.S. Department of Agriculture, and the University of Hawaii Cooperative Extension Service. The Cooperative Extension Service gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, ferry, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers. The Federal-State Market Report data were compiled by Keiji Tsugawa and Ellen Kosaki, statistical clerks.

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

The total receipt of fresh fruits and vegetables in the Honolulu market in 1960 was approximately 111 million pounds. This total is slightly over 6 million pounds less than the 1959 total. Imports decreased most with 4.2 million pounds less than in 1959. Marketings of Oahu farmers decreased by 1.2 million pounds and neighbor-island unloads decreased by .9 million pounds.

Some contributing factors to this decline are considered to be: inroads on the market made by processed and frozen foods; decrease in the receipts of low-quality products--a decrease brought about by voluntary control on the part of producers and selling agents; high cost of some imported fruits; and lighter-than-usual production of some island crops.

In-shipments from the mainland made up 54.7 percent of the 1960 supply, neighbor-island unloads made up 22.8 percent; Oahu, 21.6 percent; and foreign countries, .9 percent. For the second successive year, neighbor-island farmers marketed slightly over 1 million pounds of fresh produce more than Oahu producers. State-grown produce made up 44 percent of the 1960 supply, the same for the last 3 years, although the supply of Oahu-grown produce has declined consistently for the past 4 years.

Mainland imports of frozen fruits and vegetables decreased by only 2 percent, or 49 thousand pounds, from 1959 to 1960. During the 5-year period from 1956 to 1960 in-shipments have not changed appreciably from the average of 2.4 million pounds annually. All frozen products were from the mainland.

Selected Dairy Products and Oleomargarine

Fluid milk marketings in Honolulu amounted to 98.3 million pounds in 1960, an increase of 1.8 million pounds, or 1.9 percent, over 1959. Imports of butter

made a substantial 20.1 percent gain from 1959 to 1960. Oleomargarine marketings decreased by 1.3 percent. For the 5 years from 1956 to 1960, cheese imports have increased steadily; the total supply in 1960 was 1.8 million pounds.

Poultry Products

Eggs: The total supply of fresh eggs in the Honolulu market has shown a steady increase from 1956 to 1960. In 1960, nearly 357 thousand cases (30 dozen to a case) of eggs were marketed. This total is about 19 thousand cases more than in 1959.

Island producers contributed 82 percent to the total volume marketed in 1960. Oahu poultrymen alone contributed about 65 percent to the total, which was their greatest percentage contribution between 1956 and 1960. From 1959 to 1960, Oahu poultrymen increased their egg marketings by 18.5 percent, or 36.1 thousand cases (over 1 million dozen eggs). On the other hand, the combined imports of fresh eggs from the U. S. mainland and foreign countries decreased by 20.1

percent. Marketings of neighbor-island producers decreased slightly, by .8 percent.

Poultry meats: Poultry meats in the Honolulu market in 1960 amounted to 8.2 million pounds, nearly .3 million pounds more than in 1959. This represents a 4.1-percent increase over 1959 marketings. The State's contribution to the total increase was greater than that of mainland imports. Island producers increased marketings by 11.2 percent, while in-shipments increased by .2 percent.

Red Meats

The 1960 supply of fresh, chilled, and frozen red meats in the Honolulu market totaled 50.9 million pounds, continuing a steady upward trend since 1956. The gain from 1959 to 1960 was 867 thousand pounds, or by 1.7 percent. Foreign imports of red meats amounted to 9.2 million pounds, representing a 6.6-percent

increase from 1959, while mainland in-shipments showed a less than .5-percent increase in 1959.

Beef and veal made up 71 percent of the total volume of red meats; pork, 27 percent; and lamb and mutton, 2 percent.

Beef and veal: Although total receipts of beef and veal amounted to 35.9 million pounds in 1960, 2.5 percent more than in 1959, State cattlemen marketed .4 million pounds less than in 1959, decreasing by 2.1 percent. On the other hand,

in-shipments of beef and veal from both the mainland and foreign countries were 1.2 million pounds more than in 1959, representing a 6.7-percent increase. Imports from Australia and New Zealand contributed .8 million pounds to the total; imports from the mainland, .4 million pounds. It is noteworthy that foreign imports represent 44.7 percent of the total imports, or almost equal to that from the mainland.

Pork: A total of 13.8 million pounds of fresh, chilled, and frozen pork were

marketed in Honolulu in 1960. To this total, Oahu hog producers supplied 7.1 million pounds. Imports declined 5.5 percent from 1959 to 1960, but marketings of Island-produced pork increased 8.6 percent from 1959 to 1960. The breakdown by percentages of sources of supply indicate that the State contribution to the market was 52 percent; the mainland contribution, 47 percent; and foreign countries, only 1 percent.

Lamb and mutton: Lamb and mutton marketings in 1960 totaled 1.2 million pounds, representing a 13.4 percent decrease from 1959. Lamb and mutton marketings have consistently been less than those of all other red meats.
